Subject: RE: GS Data Tool Registration

Good afternoon Travis,

Thank you for that information. We'll be on the lookout for your ESA.

The A1-A2 application will be added to the permit application table once the permit review team informs us that it is administratively complete. As you might have inferred from the table, we will hold off on posting project specific details until the public comment period.

Thanks,
Dan

Daniel,
I will provide an ESA for the 26R project and as of now I am the only GSDT user.

Both 26R and A1-A2 are at the Elk Hills Oilfield. They are separate reservoirs and will have shared surface infrastructure.

Do you know when our A1-A2 application will be added to the list under review?

[Class VI Wells Permitted by EPA | US EPA](#)

Sorry for the delayed response,

TMH

Subject: [EXTERNAL] RE: GS Data Tool Registration

Good evening Travis,

We've received your new GSDT account request for the Elk Hills 26R project and will begin processing your account shortly. To confirm, will you be the only GSDT user, or would you like to request accounts for additional staff? Also, for clarification, we will need a separate ESA for this project in order for you to be able to submit the application when ready.

On the topic of applications, the application for your other project has come through the GSDT and the Region 9 UIC permitting staff have been informed.

For our own internal tracking purposes, and if you don't mind divulging at this time, are both of these projects for the same facility or will they be separate sites?

Thanks,
Dan

I would like to register the Carbon TerraVault 1 LLC Elk Hills 26R project.

Thanks,

TMH
